EDUCATION

Dev Bootcamp
All Facets of Web Development 2014
Dev Bootcamp was a 18 week intensive web development bootcamp. Where I had learned the fundamentals of web development.

DeVry University
NCM 2008
Primary focus was Network Communication Management

Harper
CS 2013
Computer Science, with additional certifications

SKILLS

TECHNICAL SKILLS: Ruby , Rails, Sinatra,
TDD (Rspec + Capybara) , Active Record , SQL , Node.js ,
Instagram API , Google APIs (Map, Hangout) , Javascript ,
jQuery , Ajax , Object-oriented programming ,
Version Control (Git + Github + GitLab) , HTML/CSS ,
Twitter Bootstrap , Foundation , RADAR ,
Web sockets (faye-websocket) , Heroku , Jasmine , Java,
Backbone.js

PROJECTS

Mission-Control-DBC
Mission Control is an app developed to improve DBC's students' experience when they are stuck and need help from teachers, other students, and coaches. They post a sticky on a virtual board which allows others to see their questions and help them out. The student is notified when some posts an answer. There's also a Mission Control Chat they can join. Furthermore, they can start a Google hangout from within the app.

Out-There
Out-there is a web application that was built by me within a week. The Idea behind Out-there came from my love to travel. Go anywhere in the world by just dropping a marker and getting real time photos from people in that area!

EMPLOYMENT

Apple (MindSource, Inc.)
Sunnyvale, CA
Software and QA Engineer · Dec 2014 to Mar 2015
• Tested websites, browser agnostic, to ensure successful content behavior
• Tested and approved tools used within the QA department
• Utilized command line and various open source tools to discover bugs in codebase
• Developed runbooks for test plans and test suites
• Created various technical documentation and reports
• Developed reporting communication strategy
• Developed Policies and Procedures for Apple's new Marcom QA division
• Reviewed fellow developer codebases to discover potential vulnerabilities
• Adaptable to various code languages
• Created scripts to automate and to build efficiencies in manual processes
• Collaborated within a team of developers to create Mission-Control-DBC

Dev Bootcamp
San Francisco, CA
Phase 0 Guide · Oct 2014 to Dec 2014
• Mentorship as well as tutoring position for newer web developers
• Provided actionable feedback and 1:1 tutoring
• During personal training at DBC I developed Mission-Control-DBC, a Rails web application for the DBC community to aid in proficiency via a
custom chat application, Google hangouts, notifications, and image upload.

Federal Home Loan Bank of Chicago
Chicago, IL
End-User Support · Jan 2009 to Jan 2010
•Provided technical support for other bank divisions within the organization's infrastructure
• On-boarding newer employees and setting up system access
• Assisted users with software and hardware issues that interrupted efficient business flow, from an infrastructure stand point
