PROJECTS

Mission-Control-DBC
Mission-Control-DBC Collaboration Platform
Mission-Control-DBC, developed with the student in mind, offers students a platform to collaborate and promote team building. This platform provides effenciy and content monitoring to resolve issues within a story quickly.
- Team lead
- Code collaborator
- Developed side application using web-sockets for a secure internal chat proxy

Out-There
Out-There Web Application
The idea behind Out-There is to offer users real time Instagram photos via a Google Maps marker drop and geolocation. This allows the user to explore any area of the world, whether it is to prepare for a trip or to feel like the user is part of the culture!
- Designed application
- Deployed application

Family Recipe Book
Family Recipe Book, was a way for my family and loved ones to share recipes amongst one another.
- Designed application
- Deployed application

EMPLOYMENT

Apple (MindSource, Inc.)
Sunnyvale, CA
Software and QA Engineer · Dec 2014 to Mar 2015
• Tested websites, browser agnostic, to ensure successful content behavior
• Tested and approved tools used within the QA department
• Utilized command line and various open source tools to discover bugs in codebase
• Developed runbooks for test plans and test suites
• Created various technical documentation and reports
• Developed reporting communication strategy
• Developed Policies and Procedures for Apple's new Marcom QA division
• Reviewed fellow developer codebases to discover potential vulnerabilities
• Adaptable to various code languages
• Created scripts to automate and to build efficiencies in manual processes

Dev Bootcamp
San Francisco, CA
Phase 0 Guide · Oct 2014 to Current
• Mentorship as well as tutoring position for newer web developers
• Provided actionable feedback and 1:1 tutoring
• During personal training at DBC I developed Mission-Control-DBC, a Rails web application for the DBC community to aid in proficiency via a custom chat application, Google hangouts, notifications, and image upload.

Federal Home Loan Bank of Chicago
Chicago, IL
End-User Support · Jan 2009 to Jan 2010
•Provided technical support for other bank divisions within the organization's infrastructure
• On-boarding newer employees and setting up system access
• Assisted users with software and hardware issues that interrupted efficient business flow, from an infrastructure stand point

EDUCATION

Dev Bootcamp
All Facets of Web Development 2014
Dev Bootcamp was a 18 week intensive web development bootcamp. Where I had learned the fundamentals of web development.

DeVry University
NCM 2008
Primary focus was Network Communication Management

Harper
CS 2013
Computer Science, with additional certifications
